art-textile@orange.fr

A Quebecer of Montreal, I worked for fashion designers in Paris, made costumes for films and clips, before devoting myself mainly to the patchwork Log Cabin, my passion.

Very quickly, I develop a system (Toolless) that simplifies the realization of Patchwork Log Cabin and authorizes the realization of geometric and figurative subjects without restriction.

Thanks to this system and my sewing skills, I use the Log Cabin as a material to create useful objects, clothes and volumes (cubes, pyramids, balls, stars) in addition to my quilts.

After years of participating in creative hobbies, besides taking care of my garden, I devote my time to my personal creations patchworks and clothes, and to exhibitions.
