Miscellaneous :

We have been painting silk for a long time, but in the last ten years we have started to sew the silk we are painting on, so we have discovered many interesting textures and effects that can be created with this fabric.

During this course, lasting 18 hours, more than 10 practical exercises will be realized and will lead to a beautiful catalog / artist's book, where each sheet will reflect a technique or a combination of several.

In addition to teaching different ways of texturing fabrics, the course emphasizes creativity and versatility.

We will go a little further in the use of certain techniques in seeking originality.

At the end of the course, you will be in possession of different resources to enrich and decorate fabrics or create new ones, with simple solutions that will allow you to customize your pieces.

It's a class that will surprise you and entertain you. We will put into practice the different pages of the book and we will give you a lot of additional information. We can also make items such as handbags or wall hangings.

Desedamas will bring you the tools and you your creativity !!!
